**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

Docketing.US@motorola.com

**ADVISORY ACTION**

1. This Advisory Action is in regards to the most recent response filed on 09/11/2008.

***Response to Arguments***

2. After carefully reviewing the Applicant's remarks, the following is a list of Applicant's main concerns on the previous Office Action

- a. On pages 7-8 of Applicant's remark, Applicant argues that "the ticket of Nakano does not grant another ticket, and thus cannot be a "ticket granting ticket"."
- b. On page 9 paragraphs 2-3 of Applicant's remark, Applicant argues that the phrase "distributed cross a network" addressed by the examiner on the previous rejection does not make grammatical sense, and Applicant further corrected examiner's typo by interpreting it as "distributed across a network".
- c. On pages 9-10 of Applicant's remark, Applicant further argues that the meaning of the word "across" is not the same as "cross" and the meaning of "realm" is not the same as "network".

3. With regard to Applicant's argument **a**, the examiner disagrees. The claims are interpreted by the examiner as broadly as possible in light of the specification. In the instant case of Nakano, Nakano teaches that after the electronic ticket has been generated it is further encrypted with a secret key K0 in electronic ticket management server 11 before sending it over to the users. Therefore, the examiner equates such

features of Nakano as the “ticket granting ticket” limitation in the presently recited claims.

4. With regard to Applicant’s argument **b**, the examiner admits that it was a typo error and Applicant is thanked for the effort in correcting examiner’s typo.
5. With regard to Applicant’s argument **c**, it appears to the examiner, Applicant attempts to redefine the scope of the present invention by parsing the phrase into segments of words, wherein each individual word as stated above may have different meanings separately, but when the whole phrase is read together they have the same scope of context. In the instant case of Nakano, the public key is distributed to the users across the network (Nakano: page 7, paragraph 111, and page 9, paragraphs 132-33).

### ***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lin Liu whose telephone number is (571) 270-1447.

The examiner can normally be reached on Monday - Friday, 7:30am - 5:00pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Jason Cardone can be reached on (571) 272-3933. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
